Interviewed Sister

She wanted me to interview her mother as she knew nothing about this wages but she is so rarely at home that she does not think it would be possible to cater him at home.

She has no income at all apart from the £2 10 she gives her for ~~board~~ ~~&~~ housekeeping. She takes occasional washing jobs ~~in~~ from a woman who lives a few doors away.

The house was in good repair

Head interviewed. Not sure of rent – home found for him by ? manager of factory which has taken over land of home in S. Melb where they were living previously.

House all done up – Verandah in front. Family not yet settled in.

Head says a tenement for 4 years. Unfit recently. and to help on S.P. Bookmaker, earned about £9/-.

Has been attending Royal Melbourne Hospital for "nerves." Feels better now & hopes to get work at munitions.

Pleasant manner – co-operative – but probably C.S. generally.

Wife's earnings not known.

Daughter (7) a very alert child

14.11.41 Wife earnings obtained from Head Cleaner (67 York St S. Melbourne)

Wife interviewed

Home comfortable Car good repair. Times good. Just

Interviewed wife

House terribly untidy + not in good repair. Apart from all the normal mess of 5 people living in a small house there were animals breeding all over the place — but mainly in the kitchen. The wife complained that she had not been able to find a big enough house + yet there were many families of 2 living in bigger houses in the same street.

The landlord had been asked to do some repairs + had ended up with painting the outside of the fence. The gate is falling to bits + he will not replace it although he promised to when they took over.

Interviewed wife

H. paid £230 deposit on house worth £650
She thinks they will own it in 4 or 5 years.
H. owns 6 horses & 3 double drays.
She could not give an exact estimation
of H.'s net profits but she thinks
that £6 is about the average over the
last few months. Before that business was
not as good as it is now. It is improving
all the time now.
The daughter 9/10 had infantile paralysis
& is just able to walk slightly now.

Wife interviewed.

Housing Commission Home. Tenants Law Report

very well, but have not paid much attention to garden

interviewed wife – The house was in very good repair & one of the most comfortable visited in the district. There was a modernized bathroom (light, airy, with a porcelain bath) & kitchen.

Interviewed wife. She was co-operative, but did not know the earnings of her husband, daughter (married) or son "that's nothing to do w. me as long as they pay me the board." Her husband works for the D.T. Cordial firm which makes its drinks in one factory & manufactures its boxes in another factory in P. Melbourne.

The house was old & badly in need of repair. The wife was caustic about the sort of people in Garden city. She related "the women who put their bicycles in the porcelain baths" "story that has seated all over Port Melbourne

Interviewed lead - co-operative - however did not know anything about sons earnings - She pays the rent out of her pension & he pays for everything else needed.

The house was painted outside, but still needed doing inside. The lead told said that the men were working on the inside of the other houses in the terrace before coming to her.

Interviewed wife —

House in bad repair — wall paper peeling, walls & ceilings warped. — place kept very untidy & very dirty. Wife complained that owners did not repair the gate which had been knocked down as a result of an outside accident two months ago.

This house - although ~~it~~ it is detached - is so close ~~to~~ the houses on both sides that it might as well be attached to them.

Interviewed Wife

She had only returned from hospital a few days before I saw her. She had lost a premature baby.

The house was appalling. Big chunks were falling off the walls, it was dark & there was no bath they could use. The bath reeked whenever hot water was put into it.

When the woman had her last baby, an almoner from the Children's hospital visited the house & advised them to move if possible, as it was damp. They have been unable to find another house.

They have cemented the back yard for the children to play in, & the landlady has had one room repaired because the rain used to pour in through the roof. About a year ago she had decorators sent to give a quote on repairing the inside throughout. The quote was so big that nothing has been done about it.

Interviewed Wife

~~H.~~ will have paid for house at the end of this year.
It was an old home which was pulled down but they built
O. has paid for each alteration as it came.

House in excellent ~~Land~~ condition.
~~Bad~~ Numerous rats

H. unemployed for 5 years during depression.
H. is a first ~~preference~~ member of the ~~Worker~~ Waterside Workers' Federation. Wife does not know his average salary but he always pays her £3.10 without fail + all insurances, payments on house etc. She says he never wastes money.
They own the house + but by that but they have rebuilt it all - apart from the kitchen which is repaired. All the repairs were complete 5 years ago. They have nearly finished paying off the loan they had for the last renovations - it will be paid off by the end of this year.
Tried several times to catch the husband to find out his average wage but ~~he never seems to be~~ have not been able to find him at home.

3 girls sleep in 2 beds (single) in one room. Wife + baby sleep in 1 bed in another room.

Son wants to be a Vet. Surgeon. This job prepares him for it. Putting away 10/- weekly towards the course he will have to do at the University (a year's course). Has done 12 months training with his cousin on a farm.

On the detached side of the house is a shop (only about 3 ins. between the two).

House is not in good repair.

Housing inspectors have investigated it. It has been reported ~~it~~ to the owner. Investigation 3 weeks' ago.

Kitchen gets flooded.

Back part all has to be pulled down. Sink has to be put in

Rats appalling. Come into kitchen at night

Hunks of walling have fallen on floor

The boy sleeps in the front room which is unfit to live in.

There are huge gaps in the walls & plaster all over the floor

It should be the front living room but it is unfurnished apart from his bed. In ~~winter~~ winter it is appallingly damp.

H. will be back in Aug. My next

Easter as he has shell shock. She wants desperately to be able to go to a better house before he returns.

the wife owned the house. She was hostile to the whole scheme as she had understood that we were coming around to find her opinion on various matters, not to pry into personal business. I got the opinions but not the amount her husband earned in overtime + she apparently does a lot of overtime.

From what I gathered, the H. had some money of his own when they married but has no private source of income now.

Each year they have saved up + had repairs done to the house. Now it is in excellent condition + the interior has all been "modernised." Before the war the H. got the basic wage + it has been ~~*~~ raised to a little over £5.

his inability to work.
House not in good condition - has been repaired. Outplaster
cracking under paper, etc.
Back yard small but made quite attractive. Front verandah is
left in bad shape.

Wife interviewed – Married daughter & daughter-in-law seen, and a married son visiting supplied details of ages of son (29).

Wife has been to Housing Commission this week, but told no help re housing could be given unless the house condemned.

Tenants have repapered part of house – front roof has leaked & ceilings stained. Living rooms good size & in good repair. Back bedroom said to be damp. (tho' visitor could not notice much smell)

Very small room off living room is used for meals, ironing etc. This opens on to ~~toilet~~ yard – well covered gully trap (wife told by Inspector that this against health regulations.)

Trays in wash house – where all washing done & most meals taken – very old & insanitary looking.

Holes in woodwork at back – Rats are a great trouble.

Small yard partly filled with two cars.

Wife very anxious to have home – wants married son to find a home of his own – thinks home over-crowded & she is worried by so many living there.

A very nicely kept house and garden with about 40' or 50' frontage as it is on the curve of a crescent. I interviewed the old lady, who has lost one of her sons recently at Tobruk, and so I was not able to ask her very much about her family. Her unmarried daughter lives with her, and her married son's child. (The daughter-in-law lives in another state.) This son, who is a Lt. Commander, and was probably in the permanent navy before the war, makes her payments when he is at home, but not when he is away. He sends his money to his wife. The third son is evidently quite independent. The mother's income from investments has decreased a great deal, & is now only about £50.

Information apparently not altogether reliable

Small house about 5' from road, with small flower bed in front. About 10' or 15' frontage. An old lady lives there with a young friend who is sometimes with her and sometimes goes to her people in the country. She is a very good girl, a seventh day adventist, and pays about a third of her earnings to her church. Also contributes to her family at home, but this old lady with whom she lodges only allows her to pay her a few shillings every now and then. The old lady is ill (has had a bad fall and has fractured her arm) and is unable to do much. She has a small yard at the back of the house, with a few geraniums and some herbs and parsley.

House in bad repair but Fair Rents Board + Health Authorities know about it. Have pressed landlady to make improvements.

House is an old shop -

Daughter (30) interviewed - and a large number of grubby children seen. Daughter + her family came to live at this home six months ago as their own was unsatisfactory. They were not badly ~~over~~-crowded till two months ago, when another married daughter died, aged 28. Her husband had deserted her, and there was no one to care for her ~~five~~ six children (pages 2 + 3). Daughter says C.W.D. has refused to help because of Child Endowment. Mother referred to Catholic Welfare Society, who proposed having children admitted to a Home, but their father refused to contribute to their support + nothing was done. The Policewomen have now been asked to help in the matter.

Grandson aged 6 has a rare medical condition + requires much medical treatment. Average of £2-10 per month paid to the Queen Victoria Hospital.

House in good repair, landlord does what is necessary.
small, poky house but head has been there a long time & likes it.

Head interviewed - Co-operative but very deafened & lives on her two sons in Singapore.

Usually does six days work a week - Lung doctor has advised rest for a while. Youngest son has allowed her another £6 p.o. but she has not received this yet.

House in fair condition - Roof old-fashioned one - Head's only complaint with house.

Head + wife both sew.

Home in narrow street. Has been renovated inside. + wooden panelling put in passage + two front rooms. Head thinks home is damp but wife does not.

Whole family interviewed. All very co-operative

Home in narrow side street — wider frontage than most of the other houses — small garden in front. Back yard v. small — asphalted.

Head — very young looking for years. Had to give up Shelton oak because of weak heart. Has had present job for 2 years

Wife — Not strong either. Thrifty

M.-in-Law — Amazingly young looking wonderfully alert. Pays for her clothes (very neatly dressed) — doctor etc out of 11/6 Pension money kept after paying board — is also hungry boy Savings Antipicotics & giving them to her grandchildren!

Home in good repair — needs painting outside — wife has earned money to have this done — when labour available to do it.

Head's earnings last year averaged under £4. — but working now regularly past 2 or 3 months.

Head interviewed — Rabbits & co-operatives.

Widowed Sister living at home for past year — since her husband died. She has started cake shop in the Arcade, Armadale. Has been running it at a loss up to date & drawing on savings, but hopes to make profit next month. She has had instalments to pay a Electric Stove, as well as rent.

Youngest Sister pays rent — Head pays food & household expenses. Head has breakfast & lunch at work, & widowed sister has midday meal at — so 20/- would probably cover Head's usual contribution. Youngest Sister salary not known — after Superannuation & tax deducted it is under £5.

Home In good condition except for floor boards in passage which are rotted by white ants.

Interviewed Wife of head. Rather reticent and not particularly co-operative.
The house is in excellent state of repair - spacious rooms.
Garden is quite large and very well kept.

House in Darren side street — in quite good repair.

Family lived at Korowa hill a year ago — had a home there on which mortgage raised — have now left & mortgage — no tenants available in Korowa. Came to Melbourne because of son's accident

Husband — Practically no work when in Korowa.

Son (18) had bad accident & head struck — hand practically useless tho' not amputated. He received nearly £300 compensation this year.

re Children Wife had 13 altogether — but not sure how many were stillborn. One died was shared in Murray.

Daughter (14) + friend (16) interviewed. (Head has been away. + at when visited (evening) — girls seemed both intelligent + well-behaved.

Home — a good condition - front garden well tended — both largely planted with beans.

Life — sometimes helps at market on Fridays + Saturdays, but not busy so at present.

Friend (+ daughter) spend every weekend at Chambers Flats, where his wife and three younger children are. He apparently does not pay regular board, but buys groceries etc for the household.

Head interviewed. He at first refused all information but later became co-operative & was reliable, as far as could be judged.
House was in good order & well furnished. There was a very flourishing garden at back which supplies the household with vegetables all the year round.
Frontage 36' X 90' House about 6' from path.

Interviewed housekeeper who was very reticent over age + earnings. She seemed certain that the old gentleman although generous, would refuse to give details of his income. He ~~is~~ apparently complains about taxation a great deal - so it is likely that his income is over £10 a wk. The house is a very comfortable-looking grey roughcast building - modern. There are garden + lawns cared for by a gardener.

Block - 50' x 90'.

wife interviewed (evening) V. Cooperative techniche.

Horse seemed in v. poor condition — completely furnished.

Head A.R.A. warden & wife does voluntary work.

Boarder (F) interviewed. (rettable)

She was a very active old lady. She helps in house & for part of the day is companion to an old lady – & receives 12/- weekly. She did not know income of head of house.
The house although not an old one is in need of repair – Plaster has cracked, and kitchen shows large patches of damp.
The dividing fence is broken & there is little privacy in the back yard.
Frontage & depth approx 20' x 60' – House about 8' from front path.

This family has just moved into the house and so have not had time to get it straight, but it seemed in quite good order. Interviewed pleasant woman - information reliable, though she was rather vague about the exact earnings of her family. Her husband does not make her a regular house-keeping allowance. She just asks him for what she wants.

Intermewed head - very deaf and reserved.

Information from lady in 2.

This lady in 3. does not live here - apparently has independent means - keeps on flat here as storehouse for furniture. She lives in a comfortable hotel, according to informant.
